## **HTH Worldwide Opens Access to Vital Health and Safety Information** *New Portal Makes Access Easy for Developers*

December 2, 2014 (Radnor, PA) – HTH Worldwide, a global health services and technology company, today announced the launch of its new portal designed to open access to its robust, global health and safety databases to developers seeking to enhance their products. The Application Programming Interfaces (APIs) available through this portal make it possible to efficiently deliver vital health and safety information to international travelers. HTH leveraged technology and services from Intel® Mashery™ API Management to build the portal.

HTH Worldwide develops and maintains tools and information proven to help world travelers navigate risks and access trusted medical care all around the world. Through the new portal, companies serving international travelers can enhance their services on a global scale enabling their customers to

- Prepare with personalized health and safety advice
- Access an elite network of healthcare providers
- Communicate effectively and navigate barriers to treatment

HTH is the world's leading provider of web-based and mobile healthcare tools and databases as evidenced by the success of its [mPassport](#) downloadable application, which has been recommended by experts in the travel industry including *Travel + Leisure* and *The New York Times*. HTH clients include many of the largest international healthcare companies.

“At HTH Worldwide, our mission is to help world travelers pursue their plans with confidence,” said Alex Wood, managing director for HTH Worldwide. “Making our innovative, proprietary health and safety tools available through an API portal is a great way to expand our ability to meet our goal. We are proud to have built this new portal through Intel Services.”

“Leading healthcare organizations are using APIs to transform existing business assets into innovative data products,” said Chuck Freedman, Director, Vertical Insights at Intel Services. “The HTH Worldwide program joins healthcare payers and providers leading the market by enabling developer innovation with well-managed APIs to scale vital information and services across mobile and device platforms.”
